1. Nature of Operations and Continuance of Business

Cassius Ventures Ltd. (the "Company") is an exploration stage company focused on acquiring exploration and/or development stage mineral properties for the purposes of further exploration and development. The Company was incorporated under the Business Corporations Act (British Columbia) on February 23, 2007. The Company maintains its head office at 595 Burrard Street, Suite 3083, Vancouver, British Columbia. The Company's registered and records office is located at 595 Burrard Street, Suite 2900, Vancouver, British Columbia. Its common shares are traded on the NEX Board of the TSX Venture exchange under the symbol "CZ.H".

The Company was previously focused on mineral exploration of its Nicaraguan Gold properties as held by Fortress de Nicaragua S.A. ("Fortress"), a private Nicaraguan company, which is the legal and beneficial owner of sixteen exploration concessions with a total area of approximately 137,000 hectares in Nicaragua. In April, 2015, the Company disposed of Fortress to an arm's length Nicaraguan party.

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business.

The Company has yet to generate any revenues from operations and as at April 30, 2016, had an accumulated deficit of $6,397,647 and a working capital deficit of $158,950. The above conditions, along with other factors indicate the existence of material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. The Company's ability to continue operations in the normal course of business is dependent on several factors, including the ability to secure additional financing.

Although management is of the opinion that sufficient working capital will be obtained from external financing to meet the Company's remaining current liabilities as well as future liabilities and commitments as they become due, there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. The condensed interim consolidated financial statements do not include any additional adjustments to the recoverability and classification of certain recorded asset amounts, and changes to the statement of comprehensive loss that might be necessary if the Company was unable to continue as a going concern.

2. Basis of Presentation

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including International Auditing Standard 34, Interim Financial Reporting ("IAS 34") as issued by the International Accounting Standards Board. These condensed interim consolidated financial statements do not include all disclosures required for annual audited financial statements. Accordingly, they should be read in conjunction with the notes to the Company's audited annual financial statements for the year ended October 31, 2015. The accounting policies followed in these condensed interim financial statements are the same as those applied in note 3 of the Company's audited annual consolidated financial statements for the year ended October 31, 2015.

The Board of Directors approved these condensed interim consolidated financial statements on June 27, 2016.

3. Accounting Standards Issued but Not Yet Applied

IFRS 9 – Financial instruments

In November 2009, the IASB issued IFRS 9 Financial Instruments as the first step in its project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on an entity's business model and the contractual cash flows of the financial asset. Classification is made at the time the financial asset is initially recognized, namely when the entity becomes a party to the contractual provisions of the instrument. IFRS 9 amends some of the requirements of IFRS 7 Financial Instruments: Disclosures, including added disclosures about investments in equity instruments measured at fair value in OCI, and guidance on the measurement of financial liabilities and derecognition of financial instruments. The IASB has suspended the originally planned effective date of January 1, 2015 for IFRS 9. The Company will commence assessing the impact of this new standard upon the announcement of its new effective date.

4. Mineral Properties

<u>Fortress de Nicaragua S.A.</u>

During the year ended October 31, 2014, the Company recorded an impairment charge of $4,871,196. On April 8, 2015, the sale of Fortress was completed. Although no consideration was received for the sale of Fortress, the Company relinquished obligations totalling $1,506,445 which had been previously recorded as a liability on the consolidated statement of financial position, and was recorded as a gain on the sale of Fortress in the consolidated statement of income (loss) during the year ended October 31, 2015.

6. Share Capital

The Company has an unlimited number of common shares without par value authorized.

(ii) the 90 day period begins on the date a final receipt is issued for the prospectus;

Subject to the discretion of the Board, the options granted to an optionee under this Plan shall fully vest on the date of grant of such options. In accordance with the policies of the TSXV, and subject to their approval to the contrary, options issued to consultants providing investor relations services must vest (and not otherwise be exercisable) in stages over a minimum of 12 months with no more than 25% of the options vesting in any 3 month period.

9. Fair Value of Financial Instruments

Fair value is based on available public market information or, when such information is not available, estimated using present value techniques and assumptions concerning the amount and timing of future cash flows and discount rates which factor in the appropriate credit risk. The carrying values of cash and cash equivalents, receivables, accounts payable, promissory notes, and due to related parties approximate their fair values due to their short term nature.

10. Subsequent Events

Subsequent to period end, the Company issued a total of $15,000 in promissory notes under the same terms and conditions as disclosed in note 5.
